

The chart displays sentiment data over a 168-hour period (7 days). The x-axis is labeled 'Time of the day' and shows days from Monday to Sunday. The y-axis represents the count of sentiment instances. The legend indicates three sentiment categories: Neutral (blue), Negative (orange), and Positive (green). The chart shows a strong daily rhythm. Negative sentiment is the most frequent, peaking during the day. Neutral sentiment also shows a daily peak, while Positive sentiment remains the least frequent and is more stable throughout the day. The overall volume of sentiment activity is highest on weekends, particularly on Saturday and Sunday.
